

Task 1 (20 points)

Consider the retarded, advanced, and Feynman Green functions of the one-dimensional Poisson equation,

$$g_R(t - t') = (t - t') \Theta(t - t'), \quad (1)$$

$$g_A(t - t') = (t' - t) \Theta(t' - t), \quad (2)$$

$$g_F(t - t') = \frac{1}{2} |t' - t|. \quad (3)$$

Let us define

$$f(t') = f_0 \exp(-t'^2/a^2). \quad (4)$$

Calculate

$$x_R(t) = \int_{-\infty}^{\infty} dt' g_R(t - t') f(t'), \quad (5)$$

$$x_A(t) = \int_{-\infty}^{\infty} dt' g_A(t - t') f(t'), \quad (6)$$

$$x_F(t) = \int_{-\infty}^{\infty} dt' g_F(t - t') f(t'). \quad (7)$$

The tasks are due Thursday, 07-MAR-2024. Have fun doing the problems!
